Did You Know?

According to the American Trucking Association, trucks deliver 70 percent of all freight tonnage and 80 percent of U.S. communities receive their goods exclusively by truck.

It takes nearly 9 million people to move about 11 billion tons of freight annually. Trucking collects more than \$650 billion in revenue and represents about 5 percent of U.S. Gross Domestic Product. One out of every 13 people working in the private sector in the U.S. is employed in a trucking-related job across a wide variety of industries.
